

第三单元 | 数与运算的再认识测试卷

中文 · 1 / 2

共 10 题，每题 10 分。写出关键步骤，并说明计数单位或运算依据。

01 · 计数单位

认识数的组成

① 408.35 中数字 4、3、5 分别表示几个什么计数单位？

② $\frac{5}{8}$ 的分数单位是什么？有几个这样的单位？化成小数。

02 · 比较与加减

统一计数单位

③ 把 0.6、 $\frac{3}{5}$ 、0.58 从小到大排列，并指出哪两个相等。

④ 把 0.7 和 $\frac{3}{20}$ 都写成百分之几，再求和。

⑤ $\square + 1.35 = 2.4$ 。用减法求 $\square$ ，再用加法验算。

03 · 乘法意义

解释算式

⑥ 一根绳长 $\frac{3}{4}$ 米，剪去它的 $\frac{2}{3}$ 。剪去多少米？列乘法式并解释 $\frac{2}{3}$ 的意思。

⑦ 计算 0.3×0.04 。用计数单位解释为什么积是 12 个 0.001。

04 · 运算律与逆运算

写出验算

⑧ 用乘法分配律计算 $16 \times \frac{3}{4} + 16 \times \frac{1}{4}$ 。

⑨ 已知 $0.8 \times \square = 2.4$ ，用除法求 $\square$ ，再用乘法验算。

05 · 除法与倒数

说明理由

⑩ 计算 $\frac{3}{4} \div \frac{3}{8}$ ：先改写成乘法，再说明为什么除数不能为 0。

Unit 3 | Numbers and Operations Revisited

English · 2 / 2

10 questions, 10 points each. Show key steps and explain the units or properties used.

01 · Counting units

Understand place value

- ① In 408.35, how many of which place-value units do the digits 4, 3, and 5 represent?

- ② What is the unit fraction of $\frac{5}{8}$? How many such units are there? Convert $\frac{5}{8}$ to a decimal.

02 · Compare and add

Use common units

- ③ Order 0.6, $\frac{3}{5}$ and 0.58 from least to greatest; mark equal values.

- ④ Express 0.7 and $\frac{3}{20}$ in hundredths, then add them.

- ⑤ Solve $\square + 1.35 = 2.4$ by subtraction; check by addition.

03 · Meaning of multiplication

Explain the equation

- ⑥ A rope is $\frac{3}{4}$ m long. Two thirds of it is cut off. How many meters are cut? Write a multiplication equation and explain $\frac{2}{3}$.

- ⑦ Calculate 0.3×0.04 . Use place-value units to explain why the product is twelve thousandths.

04 · Properties and inverse

Check your answer

- ⑧ Use the distributive property to evaluate $16 \times \frac{3}{4} + 16 \times \frac{1}{4}$.

- ⑨ Given $0.8 \times \square = 2.4$, find $\square$ by division; check by multiplication.

05 · Division and reciprocals

Explain why

- ⑩ Calculate $\frac{3}{4} \div \frac{3}{8}$ by rewriting it as multiplication. Why is division by zero undefined?
